

Jinnah International Airport / OPKC

General Information

Jinnah International Airport (OPKC) is the busiest airport in Pakistan and serves as the primary gateway for both domestic and international traffic. It is located in Karachi and handles a mix of heavy international and regional operations.

Key Data

Item	Details
ICAO	OPKC
IATA	KHI
Coordinates	24°54'34"N 67°09'49"E
Elevation	100 ft
Transition Level	FL050

Runways

Runway	Length (ft)	Length (m)	Surface	ILS	Notes
07R / 25L	11,155	3,400	Asphalt	Yes (25L)	Primary runway
07L / 25R	10,500	3,200	Asphalt	Yes (25R)	Parallel runway

ATC Frequencies

Position	Callsign	Frequency
DEL	OPKC_DEL	—
GND	OPKC_GND	121.600
TWR	OPKC_TWR	118.300
APP	OPKC_APP	125.500
CTR	OPKC_CTR	126.500
ATIS	OPKC_ATIS	126.700

Aprons & Stands

- **International Apron** – Widebody and international operations
- **Domestic Apron** – Narrowbody and domestic flights
- **Cargo Apron** – Freight and cargo operations

!!! note Expect stand allocation from ATC when online. Otherwise use realistic stand selection.

Departure Procedures

General

- Expect standard IFR departures when ATC is online
- Maintain assigned heading/altitude until cleared otherwise
- Follow SID if issued

Runway Usage

Runway	Typical Use
25L / 25R	Preferred for departures
07L / 07R	Used depending on winds

Notes

- Heavy traffic may require sequencing delays
 - Maintain separation after departure
 - Monitor assigned frequency immediately after takeoff
-

Arrival Procedures

General

- Expect radar vectors for ILS approach
- Descend via ATC instructions unless cleared via STAR
- Maintain speed control when instructed

Common Approaches

Runway	Type
25L	ILS
25R	ILS
07L	ILS
07R	ILS

Notes

- Expect sequencing during busy events
- Maintain assigned speed/altitude

- Report established on localizer if requested
-

Taxi Procedures

- Follow ATC instructions strictly when online
- Use standard taxi routes when offline
- Hold short of active runway unless cleared

!!! warning Runway crossings require explicit clearance from ATC.

Pilot Notes

- Always check charts before flight
 - Monitor ATIS when available
 - Be prepared for vectors instead of full procedures
 - Use correct phraseology
-

Controller Notes

- Maintain separation between parallel runway ops
 - Coordinate GND / TWR / APP carefully
 - Sequence arrivals efficiently during events
 - Manage mixed traffic (heavy + domestic)
-

Charts & Resources

 - Add scenery link here
-

Summary

OPKC is a high-traffic international airport with parallel runway operations. Expect structured ATC, sequencing, and standard IFR procedures during controlled operations.
